

# Mountain Pillow

This great decorative pillow goes together quickly with exposed seams. Cuddle® doesn't fray!

## Supply List:

- One white Cuddle® FQ
- One Cuddle® FQ, color of your choice for the lower portion of the mountain
- One bag of Fairfield Poly-fil®
- Stretch/ball point/universal jeans needle, 90/14

## Optional:

- Walking foot or many long pins

Read through the entire pattern before beginning. If possible, lighten the pressure on your presser foot a bit. Stitch length should be 3.0. Use a 1/2" seam allowance. If you are cutting each side one at a time, rather than double the fabric and cutting two pieces at once, remember to flip the pattern over when cutting the second piece.

## Directions:

1. Enlarge the pattern 200% or to the finished size you desire. Enlarging it by this amount will result in a pillow approximately 18" x 15".
2. Using the entire mountain pattern, cut two from the FQ color of your choice. These will be the base of the mountain.
3. Cut the pattern apart and with the white FQ, cut two snow or top of the mountain pieces.
4. Pin the right side of the mountain top pieces to the mountain, aligning edges. Stitch only the inner edges of the mountain top to the mountain. If your machine is unable to stitch through 4 thicknesses of Cuddle, only use one mountain top piece.
5. With wrong sides together, pin and sew the entire mountain together, leaving 4" opening on the bottom.
6. Fill with Poly-Fil.
7. Stitch the opening closed.
